PROFILE

Final-year Information Security student (TARUMT) with hands-on experience shipping full-stack systems from scratch solo and in agile teams. Holds three Cisco CCNA verified courses and produced a graded research paper on AES/RSA cryptography and phishing attack vectors. Designed and led the scheduling and student-progress modules of a 5-developer web platform, integrating Google Maps API and SMS notifications. Brings a security-first mindset, solid networking fundamentals, and clean, well-documented code to every project.

EDUCATION

Tunku Abdul Rahman University of Management and Technology (TARUMT) <i>Bachelor in Information Technology (Honours) (Information Security) 3.1981</i>	Kuala Lumpur, Malaysia <i>June 2024 – Present</i>
---	---

- Achievements: 50% Merit Scholarship Holder, Class Representative Award

Tunku Abdul Rahman University of Management and Technology (TARUMT) <i>Foundation in Computing CGPA: 3.77</i>	Kuala Lumpur, Malaysia <i>June 2023 – June 2024</i>
---	---

- Achievements: Class Representative Award, Stage Diabolo Performance

LEADERSHIP & CO-CURRICULAR EXPERIENCE

Tunku Abdul Rahman University of Management and Technology (TARUMT) <i>Class Representative (Foundation & Bachelor's Degree)</i>	Kuala Lumpur, Malaysia <i>June 2023 – Present</i>
--	---

- Acted as the primary intermediary between the student cohort and university lecturers, ensuring clear two-way communication regarding academic matters, syllabus updates, and university policies
- Gathered constructive feedback and academic concerns from peers, presenting them professionally to faculty members to improve course delivery and resolve disputes or administrative issues

<i>Level Up Your Leadership with Classical Wisdom Talk</i>	<i>June 2026</i>
--	------------------

- Examined timeless leadership frameworks and philosophical principles (such as Stoicism and strategic ethics) to enhance decision-making, resilience, and team management.
- Participated in interactive sessions focused on navigating complex organizational challenges, fostering team alignment, and practicing value-driven leadership.

<i>Deloitte Technology Talk & GenAI Workshop</i>	<i>April 2026</i>
--	-------------------

- Engaged in technical discussions with Deloitte industry leaders on modern Generative AI implementations, exploring scalable enterprise architectures and practical AI integration strategies.
- Evaluated real-world case studies on AI-driven digital transformation, security considerations, and best practices for deploying large language models within corporate environments.

<i>Bronze Medallion (Lifesaving & Water Safety) Certified Lifesaver (University Swimming)</i>	<i>June 2025</i>
---	------------------

- Demonstrated elite physical endurance, water safety protocols, and deep-water rescue techniques within an Olympic-sized (50m) facility.
- Trained in high-pressure emergency response, victim towing, and lifesaving techniques, reflecting strong discipline, situational awareness, and adaptability under stress.

Project Paper (FYP)

Secure Chat Application with Integrated Honeypot for Intrusion Detection

2026

- **Architected an Integrated Honeypot & Authentication Security Module**
Designed a modular, low-interaction honeypot mechanism within a web-based secure chat application to proactively capture, log, and analyze high-velocity brute-force and credential-stuffing attacks.
- **Designed Real-Time Threat Intelligence & Anomaly Detection**
Formulated a sliding-window algorithm and rate-limiting system (3 failed attempts within 5 minutes) to seamlessly redirect malicious actors to a semantically indistinguishable decoy interface while maintaining zero false positives for legitimate users.
- **Engineered Comprehensive Security Specifications & Analytical Visualizations**
Developed data logging schemas and administrative dashboard UI specifications to capture attacker telemetry (IPs, attempted credentials, timestamps, User-Agents) and visualize real-time attack trends.

AquaSwim

Swimming Academy Management System · ASP.NET Core MVC · JavaScript ·

2025/2026

- **Architected Class Scheduling & Student Progress Module**
Led the design and delivery of a full CRUD module for 5+ program types in a 5-developer agile team, incorporating coach assignments and capacity management that was adopted without rework.
- **Digitized Attendance Workflows & Operational Processes**
Replaced paper-based tracking with a mobile-optimized calendar scheduler and coach check-in page, demonstrating measurable process improvements for daily academy operations.
- **Integrated Location Services & Revenue Monetization Model**
Extended platform utility with Google Maps API for multi-pool locations and SMS alert hooks, while co-authoring a 4-tier monetization strategy projecting RM 156,100 in first-year revenue.

CAR-HAI

Automotive Marketplace Web App · Vanilla HTML · CSS · JavaScript

2024/2025

- **Delivered Cross-Browser Compatible Detail Modules**
Engineered 3 lightweight car-detail modules compatible across Chrome, Firefox, and Edge with zero reliance on CSS frameworks, demonstrating strong core web fundamentals.
- **Implemented Real-Time Interactive Color Configurator**
Developed a Build-Your-Own customizer with dynamic image swapping, adding 3 interactive decision points per user session to increase platform engagement.
- **Refactored Modular JavaScript Architecture**
Restructured code into reusable, modular components to optimize maintainability, reducing estimated future feature-addition effort by ~40%.

Tablet Retail & Repair Management System

Java · Object-Oriented Programming (OOP) · Software Architecture

2024/2025

- **Engineered Scalable Core Data & Inventory Models**
Architected the core Product, ElectronicDevice, and Tablet class hierarchy, incorporating a HashMap-driven InventoryItem module to ensure reliable, real-time stock tracking per device ID.
- **Implemented Secure User Management & Auth Systems**
Developed the User data model and AuthService module, enabling seamless user registration, authentication, order history tracking, and repair request management.
- **Integrated Singleton Pattern & Search Functionality**
Designed a Singleton-based MemberFunctions system to handle global 10% discount logic, and built an intuitive console UI featuring dynamic budget-range filtering for tablets.

SKILLS & INTERESTS

- **Technical Skills**

- **Programming Languages**

- C++, C#, Java, Python, JavaScript, PHP, HTML5/CSS, SQL*

- **Web & Application Development**

- ASP.NET Core (MVC), RESTful APIs, Tailwind CSS*

- **Database & Data Management**

- MySQL, PostgreSQL (basic), Database Security, AWS / Cloud*

- **Networking & Infrastructure**

- Cisco Certified Network Associate (CCNA) – 3 courses badge, Routing & switching, VLANs, Subnetting, IP Addressing, Network Troubleshooting, Firewalls & VPN Concepts, Linux CLI (Ubuntu), Windows Server & Windows OS*

- **Soft Skills**

- **Communication & Collaboration**

- Fluent in Mandarin, English, Malay and Thai (written & spoken)

- Cross-cultural collaboration

- Client-facing communication

- **Personal Attributes**

- Independent & Self-Driven – Able to manage tasks and deliver results with minimal supervision

- Proactive Learner – Always seeking to learn new technologies and tools

- Problem-Solving Mindset – Analytical and detail-oriented

- Team Player – Works well in collaborative environments (Agile teams, 5-person project groups)

- Adaptable – Comfortable working in fast-paced, dynamic environments

- Patient & Empathetic – Developed through teaching and customer service experience
